

*The world's smallest
2-way voice speakerphone pendant communicator*

**Safety & Peace-of-mind
are just a call away.....**

Call Center

Living independently is the desire of most individuals. However there are times when living alone can mean there is nobody to assist you during an emergency. LifeSentry offers the ability to summon assistance at any time with a simple push of a button.

Emergencies can happen anywhere in your home and even in the yard or driveway. LifeSentry will allow you to communicate your message instantly and efficiently from anywhere in and around your home for you to get help fast. All this with ONE button activation. Pendant is water-resistant - so, take it in the shower with you.

Local Emergency Services

Voice coverage for typical Personal Emergency Response System

With a standard personal emergency response system, you are limited by the location of the base station because you have to be within "range" to hear the call center talking to you. If you are too far from the base, you cannot hear, or more importantly, tell them what the emergency is!

LifeSentry: Full house coverage

LifeSentry's base station plugs into any standard telephone jack and will allow you to communicate your message instantly and efficiently from within many hundreds of feet of your base station. The system should cover your average American home and into the front, back and side yards.

**Our Central Station is standing by
24 hours a day 7 days a week**

Base Station

Pendant

Optional Accessory:

Emergency Wall Communicator allows for a permanent mount option for the bathroom or bedside table. Full two-way voice communication just like the pendant. Mount low close to the floor for easy access in the event of a fall. Water resistant.

US Patent #5,521,582
Canadian Patent #2,080,921
Other Patents Pending

Water Resistant The pendant allows you to summon help even if you are in the bath or shower, where many serious accidents happen.

Voice Prompted System Provides announcements during set-up, battery test and full system check.

Pendant Battery A lithium-ion battery provides several hours of talk time on a full charge, and up to several months in stand-by. Two rechargeable batteries are included. One charges in the base station charger, while the other is in the pendant. Simply swap the batteries around every few months. Press the battery test button on the back of the pendant for a second to hear an audible announcement - "battery is OK", "battery is low", or "replace battery now". No more guessing about battery status. When battery gets down to 'replace battery now' - central station is contacted.

System has standby emergency battery power Rechargeable batteries continually charge in the base station so as to provide up to 24 hours of standby power in the event of a power failure.

Multiple Pendants 1 pendant comes with the system. A total of up to 4 Pendants and Emergency Wall Communicators can be set to work with one system. Great for senior group homes.

Pendant can be carried in 3 convenient ways. Included with each system is a **Lanyard**, a **Wrist Strap/Wheelchair** holder and a **Belt Clip**. Pick the one that best suits your lifestyle.

DECT Technology: Operation at 1.9 Ghz gives super clear voice quality as well as exceptional range.

Approved in all 50 states and Canada. FCC & IC certified. Factory is ISO-9001 approved. Conforms with UL 1635 & 1637.
